

PECB Certified Accident Investigation Foundation

Become acquainted with the best practices of Accident Investigation Management Systems (AIMS)

Why should you attend?

Accident Investigation Foundation training enables you to learn the basic elements to respond to accidents in the work area and/or site. During this training course, you will be able to understand the fundamental tools and techniques used to identify and evaluate the root cause of accidents, and to take the necessary actions to prevent their occurrence in the future.

After completing this course, you can sit for the exam and apply for a "PECB Certified Accident Investigation Foundation" credential. A PECB Foundation Certificate shows that you have understood the fundamental methods, framework and processes.

Who should attend?

- Individuals involved in Accident Investigation processes and concerned with accidents in the work area and/or site
- Individuals seeking to gain knowledge about the Accident Investigation process
- Individuals interested to pursue a career in Accident Investigation

Learning objectives

- Understand the main elements and the need for Accident Investigation
- Acknowledge the role of the employer, employees and interested parties during accident investigations
- Understand the approaches, methods and techniques used to investigate and mitigate accidents in the work area and/or site.

Course agenda

DURATION: 2 DAYS

- Day 1: Fundamentals of accident investigation and response
- Day 2: Accident investigation report and continual improvement, and Certification Exam

Prerequisites
