

Your cybersecurity expertise goes beyond one program

PECB

A fully funded route to PECB ISO/IEC 27001 Lead Implementer certification for CMMC Certified Professionals (CCP).

Since CMMC Phase 2 was suspended in July, many CMMC Certified Professionals are facing greater uncertainty about what the next few months will look like. We cannot predict what comes next for CMMC. What we can do is help ensure that the cybersecurity and assessment skills you have developed remain valuable across the broader information security market.

ISO/IEC 27001 is the international standard for information security management, and its Lead Implementer credential is valued across industries and markets where organizations need to establish, manage, and continually improve their information security systems, including the defense and federal contracting world where you already work. The risk-based approach and focus on effective security controls remain the same; only the framework changes, and it can be learned adequately.

WHAT YOU GET

A package worth thousands of dollars, at no cost:

- PECB ISO/IEC 27001 Lead Implementer eLearning course, trainer-led video and full self-study materials, at your own pace
- Two exam attempts, initial and retake
- Certification application fee
- First-year Annual Maintenance Fee

From year two, standard maintenance terms apply, currently \$130 per year plus CPD.

WHO QUALIFIES

You hold an active, verifiable CMMC Certified Professional credential. That is the only requirement. If you already hold an ISO/IEC 27001 Lead Implementer certificate issued by another accredited certification body, submit it with your application. We will review it and, where the evaluation supports it, issue your PECB certification without further examination.

HOW IT WORKS

1	2	3	4
Apply Send us your CCP credential and, if you have one, your existing ISO/IEC 27001 Lead Implementer certificate.	We Review A documented evaluation of your credentials against our certification requirements within one business day.	You Study Full eLearning access, at your own pace. Most people take 15-20 hours.	You get Certified Pass the exam and receive your PECB ISO/IEC 27001 Lead Implementer certification.
