In today’s dynamic world a degree with no specialization can hardly yield well-rounded qualifications and serve as a substantial baggage for climbing the career ladder. Taking control over your own future and leading others toward triumphant fronts requires qualifications of significant value that place you in a superior position amongst others. PECB University, through its higher education opportunities, is committed to preparing you to face the increasing challenges of a given occupation while getting a handle on best field specific and business related practices. In a world of vast uncertainties and complexities, we prepare you how to apply analytical skills in solving real-world problems. We aim to develop you into a competent field expert and a smart business decision maker.

We guide you through expertise by serving competency-based and career-focused education. The core of our interest is to make our programs available to people of all demographics and dismantle the barriers of time and distance by taking advantage of technology.

We offer to help you gain a primed mindset that allows you to confront challenges, adapt to changes, and apply the newfound skills to incite a positive impact in your organization.
KEY FEATURES OF OUR PROGRAMS

+ Career-focused and competency-based programs that promote job-related skills and boost career advancement prospects;

Our MBA Degree Programs provide a combination of business management fundamentals with field specific expertise that prepare you to seek managerial roles, switch careers, or advance in your field of work. The skills acquired from our MBA programs are easily transferable to different roles.

MBA in Quality Management

PROGRAM SNAPSHOT

Credits: 48
Duration: between 12 and 36 months
Work experience: A minimum of 2 years of relevant working experience. Although you are not required to have previous experience in business administration, you are expected to have a background on the field in which you are pursuing the MBA program.

Delivery mode: Online, synchronous and asynchronous classes
Language: English
Audience: Designed for candidates seeking managerial or executive positions in Quality Management

PROGRAM DESCRIPTION

The MBA program in Quality Management develops your analytical skills and enhances your sound judgement as necessary competencies to be able to contribute to improvements in quality systems, services or products. The program equips you with the necessary knowledge and skills to analyze business challenges, determine root causes of nonconformities, and initiate improvements in productivity, effectiveness and efficiency.

You become familiar with analysis tools, develop strategic reasoning, and enhance problem-solving as well as decision-making skills. You learn not only the theory of various concepts but also the technical applications of these concepts that consecutively help you to design, implement, and manage quality systems in an organization.

The coursework offered through this program is designed to improve your ability to analyze organizational challenges from various perspectives while taking into account existing data, workflow, and job specific operations.

PROGRAM LEARNING OUTCOMES

• Demonstrate how to create a quality management policy in an organization and explain how to enforce compliance to quality.
• Conduct gap analysis for comparison of various systems and develop a quality management plan for an organization.
• Gain an integrated view to management of quality systems and acquire managerial and leadership skills.
• Understand how marketing, technology, and people can simultaneously be utilized to meet quality objectives and achieve customer satisfaction.
• Become an additional asset to the organization by ensuring that the products or services offered are of high quality, competitive in the market, and bring additional profits to the organization.
The MBA degree may land you empowering jobs including but not limited to the positions below:

- Quality Assurance Manager
- Quality Auditor
