Introduction to the ISO 31000 Foundation Certificate Program

The ISO 31000 standard provides guidelines on the process of identifying, assessing, treating, monitoring, reviewing, recording and reporting risk. It provides guidance for organizations aiming to develop, implement and continuously improve a process that will ensure effective risk management. Moreover, it recommends integrating the risk management process into the organization's strategy and planning, management, reporting processes, policies, values and culture and provides recommendations on how to apply risk management at all organization's levels, functions, projects and activities.
