Why is it imperative to certify your organization’s Management System?

Given the current demanding global market, the frequent financial turbulences, the decreasing efficiencies and eroding bottom lines, it is vital for organizations to prove compliance with the requirements of internationally recognized standards.

A certified management system, therefore, is a means of ensuring continuity of operations by aligning policies, performance targets and organizational objectives. Regardless of the organization’s size, the MS certification positively influences the organization’s level of internalization and enhances its values by catalyzing the efficiency improvement and risk management process, thus increasing consumer satisfaction, and eliminating redundancies.

To achieve stability and minimize potential risks, organizations should develop and maintain a management system that addresses their operational needs, assists in the implementation of best practices, and ensures the organization’s survivability and competitiveness.
Why choose PECB as a Third Party Certification Body?

Certifying your organization against international management system standards demonstrates that your organization is in compliance with standard requirements and best practices. Choosing the right third party certification body may not be easy. However, choosing to work with an accredited certification body that complies with international regulatory requirements and has been thoroughly audited by a well-known accreditation body against ISO/IEC 17021-1, will ensure that you receive valuable and credible certification services.

PECB is an IAS accredited certification body for persons, management systems, and products on a wide range of international standards. As a global provider of audit and certification services, as well as training and examination services, PECB offers its expertise on multiple fields, including but not limited to Quality Management Systems, Information Security, Business Continuity, Service Management, Risk and Management, Health, Safety, and Environment.

We at PECB strive to provide the most preeminent auditing and management system certifications that will distinguish your organization in the market. Our Certified MS Auditors hold a certification that is the benchmark for management system audits, and demonstrates their commitment, excellence, and professionalism. Moreover, our primary goal is to provide services that can benefit the society as a whole with integrity, professionalism, and fairness.
Understanding the Certification Process

Upon verifying that your organization is in compliance with the requirements of the relevant standard by means of an audit, a Management System Certification is granted by PECB. This certification is then maintained through scheduled annual surveillance audits conducted by PECB, with the re-certification audit performed on a triannual basis.

PECB CERTIFICATION PROCESS

YEAR 1 (INITIAL CERTIFICATION)

PRE-AUDIT
This is optional, and it must be done at least 3 months before the Certification Audit

AUDIT PLAN
The audit plan has to be mutually agreed

AUDIT STAGE 1 AND 2
Non-conformities must be closed at within 3 months after the audit conclusions

INITIAL CERTIFICATION
Certificate will be issued within 2 weeks after the successful audit closing

YEAR 2 (1st SURVEILLANCE AUDIT)

AUDIT PLAN

SURVEILLANCE AUDIT 1

YEAR 3 (2nd SURVEILLANCE AUDIT)

AUDIT PLAN

SURVEILLANCE AUDIT 2

RE-CERTIFICATION AUDIT
Within two months before the triennial certificate expiration
Continuity, Resilience, and Recovery Systems involve a set of strategies that will help the organization deliver qualitative services and products by designing, managing and improving procedures and processes.

As the world is riskier than it used to be and disruptions are far more frequent, certifying your organization against Continuity, Resilience and Recovery standards demonstrates your organization’s maturity in practicing these standards, and its commitment to ensuring substantial performance improvements. Implementing CRR standards will help organizations remain resilient and attain qualitative services based on international best practices.

Our Continuity, Resilience, and Recovery Management Systems Certifications include the following standards:

- ISO 22301 – Business Continuity Management Systems;
- ISO 28000 – Supply Chain Security Management Systems;
- BCE – Business Continuity Essentials.

Certifying your organization against Continuity, Resilience, and Recovery standards will demonstrate that your organization is compliant with the requirements and is committed to these fields.
ISO 22301 Business Continuity Management Systems Certification

In today’s world, organizations consider it as essential to be protected against potential disruptions, incidents, and internal/external threats. The ISO 22301 standard is based on best practices, which help organizations gain an distinctive competency over their competitors in terms of operational resiliency. An effective business continuity management system (BCMS) will help organizations to quickly recover their critical business functions, while minimizing the adverse impacts a disruption could have on their value and reputation. Implementing a Business Continuity plan within your organization means that you are prepared for the unexpected and you can effectively respond to contingencies.

BCI reported that 21% of organizations planned to increase their funds for Business Continuity in 2017.
BENEFITS OF ISO 22301 CERTIFICATION

- Identifies, manages and reduces threats
- Builds a resilient organizational culture
- Maximizes quality and efficiency using best practices
- Guarantees continuity of products and services
- Reduces impacts of emergencies and disruptions
- Helps build a strong reputation
- Increases customer reliability and loyalty
- Improves risk profile to key stakeholders (customers, suppliers and partners)
- Helps comply with all mandatory legal and regulatory requirements
- Aligns with other ISO management system standards

IS YOUR ORGANIZATION PREPARED FOR ISO 22301 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help the organization implement, manage, and improve their Business Continuity Plan. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 22301 audit and certification process:

- ISO 22301 Introduction (1 day)
- ISO 22301 Foundation (2 days)
- ISO 22301 Lead Implementer (5 days)
- ISO 22301 Lead Auditor (5 days)
ISO 28000 Supply Chain Security Management Systems Certification

ISO 28000 addresses supply chain security by helping organizations to evaluate and manage risks as they ascend in their supply chain. Implementing the ISO 28000 framework demonstrates to key stakeholders such as customers, suppliers and partners that your organization is committed to the safety of individuals and to the protection of its goods and services from various threats. Moreover, certifying your management system against the ISO 28000 standard will help your organization improve its profitability and quality by following international best management practices.

According to Geoff Whiting’s studies, 79% of companies with high-performing supply chains reach income growth greater than the average within their industries.
BENEFITS OF ISO 28000 CERTIFICATION

› Monitors and manages security risks throughout business and supply chain
› Demonstrates commitment to the safety of individuals and security of goods and services
› Gains the stakeholders trust by demonstrating a strong supply chain management
› Increases customer reliability and satisfaction
› Improves the organization’s reputation and assists in gaining a competitive advantage
› Ensures cost savings by reducing security incidents
› Improves trade across borders
› Increases the efficiency of the overall system

IS YOUR ORGANIZATION PREPARED FOR ISO 28000 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help the organization implement, manage, and improve the Supply Chain Management System. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 28000 audit and certification:

› ISO 28000 Introduction (1 day)
› ISO 28000 Foundation (2 days)
› ISO 28000 Lead Implementer (5 days)
› ISO 28000 Lead Auditor (5 days)
Business Continuity Essentials (BCE) Certification

Adopting the BCE requirements allows your organization to identify and manage threats, show compliance with ISO 22301, and set up an operative BCMS with less guidance from management. Certifying your organization with BCE demonstrates your organization's ability to operate during incidents and interruptions. In addition, your credibility to stakeholders, partners and customers will increase significantly. The reduced number of controls will lower the implementation efforts and set up a steppingstone towards the full ISO 22301 certification for the organization.

As estimated by experts of DRBenchmar.org, the cost of losing critical applications has been more than $5,000 per minute.

**BENEFITS OF BCE CERTIFICATION**

- Decreases implementation efforts through compact number of controls
- Demonstrates the organization's agility
- Saves costs by dropping budgets of tendering
- Costs less than the ISO 22301 implementation and certification
- Minimizes the impact of incidents and disruptions while ensuring continuity of services and goods
- Improves the organization's reputations and assists in gaining a competitive advantage
- Enhances customer reliability and credibility
- Helps your organization comply with legislation, regulators and customers
- Outlines which external and/or internal factors create the uncertainty that increases risk
- Determines the scope of the business continuity management system (BCMS)
- Builds a successful path towards ISO 22301 certification
In today’s technology-driven environment, the significance of Information Security Management lies in the fact that it helps your organization find the golden middle between security and availability of information, and maintain both the integrity and continuity of business practices. Also, the ISM guides organizations towards integrating Information Security activities in their internal processes which results in the effective management of security credentials and sensitive data.

Implementing of the Information Security Management in your organization will successfully minimize the risks of damage and loss of sensitive information, and effectively manage data privacy based on best practices of international standards.

Our Information Security Management Certifications include the following standards:

› ISO/IEC 27001 – Information Security Management Systems;
› ISE – Information Security Essentials.

Certifying your management system against ISM standards will ensure that your organization is successfully implementing and managing information security by installing security standards and frameworks based on best practices.
Implementing an Information Security Management System (ISMS) based on ISO/IEC 27001 shows that your organization exercises risk management to minimize the adverse impacts of internal and external threats that may affect its information security. Also, this exemplifies that you have an effective risk assessment, incident management and business continuity processes within your organization. The fulfillment of ISO/IEC 27001 requirements portrays your willingness and persistency to properly secure, manage and protect valuable information through best practices and frameworks.

According to ISO Global Report, 52% of organizations that have been certified against the ISO/IEC 27001 recognize the certification as an investment that is fully justified by the benefits derived.
BENEFITS OF ISO/IEC 27001 CERTIFICATION

› Equips top management with best management practices
› Assists in gaining competitive advantage
› Maintains intellectual property and valuable information
› Helps reduce costs due to incident and threat minimization
› Demonstrates legislative, contractual, and regulatory compliance
› Aligns information security with the organization’s objectives
› Ensures customers and stakeholders that their information is safe

IS YOUR ORGANIZATION PREPARED FOR ISO/IEC 27001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help the organization establish, implement, maintain and continually improve the Information Security Management System. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO/IEC 27001 audit and certification:

› ISO/IEC 27001 Introduction (1 day)
› ISO/IEC 27001 Foundation (2 days)
› ISO/IEC 27001 Lead Implementer (5 days)
› ISO/IEC 27001 Lead Auditor (5 days)
Information Security Essentials (ISE) Certification

The ISE certification will demonstrate that your organization’s management system is compliant with the ISO/IEC 27001 implementation requirements. The implementation of ISE enables different departments in your organization to efficiently maintain and manage essential information security controls with reduced guidance from the top management. This will result in establishing and building communication channels to help your organization address challenges and receive management’s approval for the implementation of Information Security Essentials.

According to a report by IBM Security, the threat landscape for valuable information assets within a company is unauthorized access or credentials abuse.

BENEFITS OF ISE CERTIFICATION

- Serves as a practical steppingstone to accomplish full ISO/IEC 27001 certification
- Helps in operational planning for the information security risk assessment and treatment
- Provides physical and environmental security
- Implementation efforts are minimized through reduced number of controls
- Gives you market advantage through international recognition
- Involves incident management and information security continuity
Service Management Systems are significant to organizations because they include a set of activities and strategies that are vital for achieving organizational objectives. These strategic methods involve: planning, strategies, policies, documentation and processes.

Service Management Systems will support your organization to better meet the requirements of suppliers and customers. Having implemented any of the Service Management standards within your organization proves that it will continually grow while guaranteeing that IT service management processes and asset management outlines are affiliated with best practices.

Our Service Management Certifications include the following standards:

- ISO/IEC 20000 – IT Service Management Systems;

Implementing Service Management Standards in your organization helps you to demonstrate trustworthiness and high excellence of service as well as your commitment to use assets in the most efficient and effective way.
ISO/IEC 20000 IT Service Management Systems Certification

ISO/IEC 20000 IT Service Management Systems (ITSMS) state the requirements for the service provider to plan, establish, implement, operate, review, maintain, and improve an SMS based on best practices. The implementation of ISO/IEC 20000 means that your organization will continually improve while significantly increasing the efficiency and reliability among its personnel, customer satisfaction, and the quality of provided IT services. Moreover, ITSMS will help your organization to focus on the implementation of suitable and effective processes for maintaining its goals and efficiently managing costs.

According to the ISO Survey of Management System Standard Certifications 2016, 63% more certificates were issued compared to one year before.
BENEFITS OF ISO/IEC 20000 CERTIFICATION

› Helps to decrease the number of incidents
› Improves organization’s reliability and credibility
› Delivers an outline to integrate people, technology and processes
› Manages costs while improving financial savings
› Boosts consumer satisfaction
› Increases comprehension of business objectives
› Creates a culture of continuous improvement
› Helps to understand responsibilities better
› Boosts quality and efficiency
› Increases awareness toward legislation
› Helps the organization to gain competitive advantage

IS YOUR ORGANIZATION PREPARED FOR ISO/IEC 20000 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations manage, implement, and improve a SMS. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO/IEC 20000 audit and certification process:

› ISO/IEC 20000 Introduction (1 day)
› ISO/IEC 20000 Foundation (2 days)
› ISO/IEC 20000 Lead Implementer (5 days)
› ISO/IEC 20000 Lead Auditor (5 days)
The implementation of an Asset Management System based on ISO 55001 in your organization will increase the effectiveness and efficacy of the existing system which will result in greater improvements and increased productivity and returns. It will also help to minimize costs and risks related to asset management and achieve the organization’s targets. Based on the best practices, an asset management system offers a framework which boosts the customer and stakeholder satisfaction and confidence. This standard is applicable to all organizations, regardless of their size or industry and assists to identify and encourage more efficient and time-saving processes, and provide and maintain business growth.

According to European Fund and Asset Management Association (EFAMA) report, Europe ranks as the second largest market in the global asset management industry, managing 31% of the total amount of assets managed globally at end 2015 (EUR 68 trillion).
BENEFITS OF ISO 55001 CERTIFICATION

› Upgrades services and organizational sustainability
› Supports improvement and a long term business growth
› Increases profitability and long term investment opportunities
› Manages assets lifecycle
› Ensures that assets fulfill their necessary function
› Remedies communication among departments
› Manages risks and costs related to asset ownership
› Assists towards funds to shareholders
› Helps the development of viable and predictable cash flows
› Improves the quality assurance for customers/regulators
› Boosts brand reputation through compliance

IS YOUR ORGANIZATION PREPARED FOR ISO 55001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations improve and increase productivity and returns in the organization, while implementing an efficient asset management system. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 55001 audit and certification process:

› ISO 55001 Introduction (1 day)
› ISO 55001 Foundation (2 days)
› ISO 55001 Lead Implementer (5 days)
› ISO 55001 Lead Auditor (5 days)
Governance, Risk, and Compliance involve the strategies for helping organizations effectively manage their overall performance in each area of corporate governance, enterprise risk management, and compliance.

The importance of Governance, Risk, and Compliance (GRC) is significant for an organization. Successful implementation of GRC involves deliberation of the requirements, approaches, and potential consequences. By implementing GRC standards, organizations will be able to integrate the GRC strategies across all organizational units in a transparent, efficient and effective manner.

Our Governance, Risk and Compliance Certification includes the following standards:

- ISO 37001 – Anti-Bribery Management Systems;
- GDPR Audit Assessment.

Certifying your organization against Governance, Risk and Compliance standards will ensure an effective and efficient way of managing assets, risks, and bribery in order to create a better ethical business culture.
ISO 37001 Anti-Bribery Management Systems Certification

The ISO 37001 - Anti-bribery Management Systems (ABMS) is applicable to all sizes, nature, and complexity of the organization’s business activities. Implementing the ISO 37001 requirements cultivates an anti-bribery culture which will increase trust and transparency within the organization. The Anti-bribery Management Systems can help your organization to develop, implement and maintain an anti-bribery program that enhances anti-bribery controls and helps detect and avoid bribery risks within the organization. The ISO 37001 can be implemented as a stand-alone standard or can be integrated with other management systems that are already implemented by the organization.

According to the International Monetary Fund (IMF), the annual cost of bribery is estimated to be $1.5 to $2 trillion (2017).
BENEFITS OF ISO 37001 CERTIFICATION

- Demonstrates organization’s commitment to good anti-bribery practices
- Helps the organization gain competitive advantage
- Enhances confidence, which can lead to business expansion
- Increases awareness of effects of bribery on the organization and emphasizes the ability to prevent and detect bribery
- Improves the organization’s reputation by providing assurance of legal compliance
- Decreases costs and provides better insights on how the compliance program is implemented across the organization
- Implements the necessary measures designed to prevent, detect and address bribery

IS YOUR ORGANIZATION PREPARED FOR ISO 37001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations prevent, identify, report, and deal with bribery within the organization. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 37001 audit and certification process:

- ISO 37001 Introduction (1 day)
- ISO 37001 Foundation (2 days)
- ISO 37001 Lead Implementer (5 days)
- ISO 37001 Lead Auditor (5 days)
Currently, with the introduction of General Data Protection Regulation (GDPR) from the European Union and its enforcement on May 2018, the importance of data protection collected from organizations for a variety of reasons is becoming the utmost objective of each organization and involved individuals.

Without a doubt, the business growth in the modern world drives up the amount of collected personal data from organizations for different purposes. As a result, there is a need for organizations to develop an enhanced system to manage the collection, processing, and storing of data, based on the premises of General Data Protection Regulation (GDPR).
WHAT IS GDPR AUDIT ASSESSMENT?

The aim of the GDPR audit assessment is to evaluate and measure the compliance of your organization towards GDPR requirements. A GDPR audit assessment provides an estimate evaluation of the ongoing process in your organization in terms of risks and benefits which need to be considered in order to achieve compliance to the GDPR.

Our extensive experience in the information security and data privacy makes our GDPR audit assessment the most enhanced and comprehensive service. Therefore, the purpose of the PECB GDPR audit assessment is to assist your organization in identifying the areas of improvement and evaluating your organization’s commitment to GDPR requirements. The audit assessment duration will be determined based on the size of your organization, scope, and business & process complexity.

We believe that GDPR audit assessment is an important step at this stage of your organization growth in regards to the greater transparency and information of your clients about the concept of data protection and individual privacy rights.

BENEFITS OF PECB GDPR AUDIT ASSESSMENT

- Demonstrate accountability and compliance with the GDPR
- Show commitment to data protection and privacy
- Prevent financial and data loss
- Create competitive advantage in the market
- Increase reputation and brand strength
- Remedies, liabilities, and penalties
- Develop an appropriate level of expertise for GDPR legal and technical evaluation

GDPR Audit Assessment is a third-party audit performed by PECB which, upon verification that an organization is in compliance with the requirements of General Data Protection Regulation, will issue a GDPR attestation. This attestation is then maintained through regularly scheduled annual surveillance audits by PECB, with re-assessment of the General Data Protection Regulation performed on a triennial basis.

Note: PECB will not accept any liability that may arise as result of any security breach or vulnerability in your system that may impact the compliance to the GDPR requirements after the audit assessment.
Based on the best international practices, Health, Safety and Environment (HSE) standards are designed to help organizations ensure occupational health and safety, environmental protection, and compliance to relevant laws and regulations. These standards also help organizations to avoid and diminish accidents and emergencies, and reduce the negative environmental impacts.

HSE Management Systems are intended to support organizations in building a systematic and integrated system of general management with health and safety in order to avoid illness and injury and establish a response plan when these issues occur. This will demonstrate the professional commitment to building a safe and healthy workplace and at the same time follow the Health, Safety and Environment requirements.

Our Health, Safety, and Environmental Management Systems Certifications include the following standards:

- ISO 14001 – Environmental Management Systems;
- ISO 22000 – Food Safety Management Systems;
- ISO 45001 – Occupational Health and Safety Management Systems;
- ISO 20121 – Event Sustainability Management Systems;
- EME – Environmental Management Essentials.

Certifying your organization against HSE standards proves that you are committed to following the best international practices and being compliant with health and safety laws and regulations.
ISO 14001 Environmental Management Systems Certification

ISO 14001 provides the requirements for a structured management approach to environmental protection. Implementing an Environmental Management System based on ISO 14001 will help your organization to improve its environmental performance, by being committed to managing and controlling environmental risks. Moreover, this will minimize the environmental negative impacts, improve the performance and add value to the organization.

According to ISO, a total of 346,189 certificates were issued in 2016 for ISO 14001. China is the country with the highest number of ISO 14001 Certificates with a total of 137,230. According to National Oceanic and Atmospheric Administration in U.S., weather disasters cost recorded $306 billion in 2017.
BENEFITS OF ISO 14001 CERTIFICATION

- Manages and controls the environmental impacts
- Improves efficiency and reduces costs
- Improves the management of environmental risks
- Enables efficient use of resources, while reducing waste
- Determines and controls the statutory and regulatory requirements
- Increases the environmental awareness of the employees
- Gains the confidence of stakeholders, employees and customers
- Demonstrates commitment to social responsibilities
- Improves your credibility and image
- Improves environmental performance of the supply chain

IS YOUR ORGANIZATION PREPARED FOR ISO 14001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations implement, manage, and improve their environmental performance. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 14001 audit and certification process:

- ISO 14001 Introduction (1 day)
- ISO 14001 Foundation (2 days)
- ISO 14001 Lead Implementer (5 days)
- ISO 14001 Lead Auditor (5 days)
- ISO 14001:2015 Transition (2 days)
The ISO 22000 Food Safety Management Systems provide requirements which can help organizations control and manage food safety hazards. Certifying organizations against ISO 22000 demonstrates their constant commitment to food safety through the supply chain and production process. Moreover, this certification provides a useful approach that safeguards the reduction of food safety risks and builds up consumer confidence.

According to CDC, it is estimated that in the U.S each year approximately 48 million individuals get sick, 128,000 are hospitalized, and 3,000 die of foodborne diseases.

According to ISO, a total of 32,139 certificates were issued in 2016 for ISO 22000.

China is the country with the highest number of ISO 22000 Certificates with a total of 11,069.
BENEFITS OF ISO 22000 CERTIFICATION

- Ensures commitment to effective management of food safety hazards and risks
- Ensures the engagement of HACCP and other preventive plans that ensure food safety
- Demonstrates compliance with all relevant statutory and regulatory food safety requirements
- Decreases the rates of foodborne illnesses
- Enhances reputation and corporate image
- Provides assurance about safety, reliability, and quality
- Increases staff awareness of their responsibilities
- Integrates food safety management systems and quality management schemes within an organization
- Minimizes the food safety risks
- Improves the customer satisfaction and suppliers

IS YOUR ORGANIZATION PREPARED FOR ISO 22000 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations manage and implement food safety management systems and improve food safety performance within their organization. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 22000 audit and certification process:

- ISO 22000 Introduction (1 day)
- ISO 22000 Foundation (2 days)
- ISO 22000 Lead Implementer (5 days)
- ISO 22000 Lead Auditor (5 days)
Occupational Health and Safety Management Systems Certification

OHSAS 18001 Occupational Health and Safety Management Systems Certification

The OHSAS 18001 provides a framework which helps your organization to identify, manage and minimize the health and safety risks within the workplace. Moreover, this standard helps organizations reduce waste of resources, allocate time efficiently, and increase the satisfaction of employees and customers. In addition, the standard will ensure legislative and regulatory compliance and reduction in the likelihood of prosecution and fines for the organization.

ISO 45001 Occupational Health and Safety Management Systems Certification

ISO 45001 is the first international standard which specifies the requirements for occupational health and safety. This standard provides a framework for organizations in order to increase their safety, reduce occupational risks, enhance workplace well-being and proactively improve occupational health and safety performance. Being built upon the same principles as OHSAS 18001, ISO 45001 focuses more on the interaction between the organization and its business environment, and also places an emphasis on organizational risks and opportunities. Moreover, ISO 45001 requires ongoing support from the top management and the involvement of workers in the establishment, implementation, maintenance and continual improvement of the OH&S Management Systems.

According to the International Labour Organization (ILO), more than 2.78 million workers die every year as a result of occupational accidents or work-related diseases.

According to Health and Safety Executive (HSE), the estimated annual costs of workplace injuries are £5.3 billion (2015/16).
BENEFITS OF OHSAS 18001 AND ISO 45001 CERTIFICATIONS

- Demonstrates commitment to health and safety requirements
- Improves the brand reputation
- Provides competitive advantage
- Demonstrates compliance with legal requirements
- Develops a strong system for sustaining and continuously improving health and safety in the workplace
- Eliminates or minimize workplace risks
- Ensures the health and well-being of employees
- Increases employee motivation through the provision of a safer workplace
- Reduces the likelihood of prosecutions and fines
- Promotes effective procedures and processes
- Reduces costs and downtime
- Minimizes the rate of accidents and unplanned risks
- Boosts stakeholders’ confidence
- Drives new customer acquisition
- Improves the overall performance of the organization
- Encourages continual improvement

IS YOUR ORGANIZATION PREPARED FOR OHSAS 18001 OR ISO 45001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons who want to improve workplace health and safety performance within their organization. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the OHSAS 18001 and ISO 45001 audit and certification processes:

- OHSAS 18001 Introduction (1 day)
- OHSAS 18001 Foundation (2 days)
- OHSAS 18001 Lead Implementer (5 days)
- OHSAS 18001 Lead Auditor (5 days)
- ISO 45001 Introduction (1 day)
- ISO 45001 Foundation (2 days)
- ISO 45001 Lead Implementer (5 days)
- ISO 45001 Lead Auditor (5 days)
- ISO 45001 Transition (2 days)
ISO 20121 states the requirements for an Event Sustainability Management System to improve sustainability for all event-related activities. Moreover, it will help you improve the processes, which will lead to continuous performance improvement without interrupting the events. Certifying your organization against ISO 20121 will help you improve the efficiency and performance, increase the customer and stakeholder trust, demonstrate a commitment to sustainability management and embed continual improvement by reducing the environmental impacts.
BENEFITS OF ISO 20121 CERTIFICATION

› Improves the environmental sustainability of your organization
› Achieves a competitive edge and higher profits
› Identifies ways to improve event planning and delivery
› Improves the image and credibility of the event
› Enhances the reputation and strengthens relationships with customers, suppliers, partners and other external stakeholders
› Minimizes costs with respect to material consumption, waste, and energy
› Integrates with other ISO standards for better results
› Helps toward customer satisfaction
› Ensures compliance with regulations requirements
› Ensures minimal environmental impact

IS YOUR ORGANIZATION PREPARED FOR ISO 20121 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations manage, implement, and improve the environmental sustainability of its events. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 20121 audit and certification process:

› ISO 20121 Introduction (1 day)
› ISO 20121 Foundation (2 days)
› ISO 20121 Lead Implementer (5 days)
› ISO 20121 Lead Auditor (5 days)
Environmental Management Essentials (EME) Certification

EME - Environmental Management Essentials is an innovative certification that is offered by PECB for an easier and quicker implementation of a standard covering its most important sections. Organizations that apply EME demonstrate compliance in relation to the implementation of Environmental Management Systems according to ISO 14001. In addition, your organization will be able to enhance its credibility and reputation and gain a competitive edge. The EME certification offers an approach to all the organizations that want to determine the scope of an environmental management system, build a communication channel, establish internal and external communication processes, create and maintain documented information, and plan actions to minimize negative environmental impacts.

**BENEFITS OF EME CERTIFICATION**

- Creates and maintains documented information
- Reduces the implementation efforts through specific controls
- No extra training is necessary for already certified ISO 14001 EMS implementers and auditors
- No voided implementation efforts when transitioning to the ISO 14001 EMS
- Creates marketing advantage through international certificate recognition
- Increases the organization’s credibility
- Ensures compliance with legislation, regulators, and customers
QUALITY MANAGEMENT SYSTEMS

Quality Management Systems specifies a set of policies, processes and procedures that organizations need to follow in order to create and deliver products and services to meet customer needs and expectations.

Having implemented the Quality Management System in your organization proves that you have met the necessary requirements, regulations, and policies. This is an effort to demonstrate that you are fully committed to improving quality, effectiveness, and performance.

Our Quality Management Certifications include the following standards:

- ISO 9001 – Quality Management Systems;
- ISO 13485 – Medical Devices Quality Management Systems;
- ISO 30301 – Records Quality Management Systems;
- QME – Quality Management Essentials;
ISO 9001 Quality Management Systems Certification

ISO 9001 Quality Management standard is a system which provides a documentation of processes, procedures, and responsibilities in order to achieve qualitative outcomes. This standard is applicable to all organizations, regardless of their size or industry, and it enables them to identify, measure and control several business aspects which lead to improved business performance. Having ISO 9001 implemented within the organization means that you have established a framework based on best international practices, which intend to help organizations achieve their objectives, decrease their internal costs, increase their revenues and most importantly improve the level of customer satisfaction.
BENEFITS OF ISO 9001 CERTIFICATION

- Meet customer needs and requirements
- Reduce costs related to waste, rework and non-value added activities
- Provide continuous assessment and improvement
- Improve business performance
- Become more credible and competitive
- Integration and alignment of internal processes
- Increased market share
- Reliable outcomes, measured and monitored
- Enhance customer satisfaction

IS YOUR ORGANIZATION PREPARED FOR ISO 9001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations manage, implement, and improve their quality management system. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 9001 audit and certification process:

- ISO 9001 Introduction (1 day)
- ISO 9001 Foundation (2 days)
- ISO 9001 Lead Implementer (5 days)
- ISO 9001 Lead Auditor (5 days)
- ISO 9001:2015 Transition (2 days)

According to the Harvard Business School, organizations that have adopted ISO 9001 subsequently have grown faster in sales, employment, payroll, and average annual earnings.
ISO 13485 Medical Devices Quality Management Systems Certification

ISO 13485 specifies the requirements for a quality management system for which an organization needs to demonstrate its ability to provide medical devices and related services that meet customer and regulatory requirements. Being certified against this standard proves that your organization is committed to the safety and quality of its products, which as a result improves the organization’s overall performance, reduce and potentially eliminate uncertainties, and increase credibility, global recognition, and customer satisfaction.
**BENEFITS OF ISO 13485 CERTIFICATION**

- Increases profit margins
- Improves product safety
- Reduces operational costs
- Guarantees qualitative products and services
- Monitors, measures, and analyzes processes and customer feedback
- Increases access to more markets
- Reduces product failures

**IS YOUR ORGANIZATION PREPARED FOR ISO 13485 CERTIFICATION?**

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations manage and improve the quality of products throughout their life-cycle, including service and delivery. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 13485 audit and certification process:

- ISO 13485 Introduction (1 day)
- ISO 13485 Foundation (2 days)
- ISO 13485 Lead Implementer (5 days)
- ISO 13485 Lead Auditor (5 days)
ISO 30301 specifies the requirements that are to be met by a management system for their records management. This standard aims to help organizations to implement, operate and improve the Management System for Records. By implementing the framework of ISO 30301, which is based on the best industry practices, your organization will eliminate redundancy, establish consistency, optimize processes and resources, reduce maintenance costs, and improve the decision-making process and the use of property assets.
BENEFITS OF ISO 30301 CERTIFICATION

› Increases efficiency
› Contributes to the development of relevant policies
› Gains a competitive market advantage
› Enables cost savings
› Provides a more effective system for records
› Meets regulatory and customer requirements
› Assesses performance measures
› Ensures a smooth transition toward audit conformity

IS YOUR ORGANIZATION PREPARED FOR ISO 30301 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons, who want to acquire the necessary skills and knowledge to lead, direct and manage the successful implementation of a MSR within an organization. The following training courses will help you to manage, instrument and prepare your company for the ISO 30301 audit and certification process:

› ISO 30301 Introduction (1 day)
› ISO 30301 Foundation (2 days)
› ISO 30301 Lead Implementer (5 days)
› ISO 30301 Lead Auditor (5 days)
ISO 18788 Private Security Operations Management Systems Certification

The ISO 18788 standard specifies the requirements for organizations that conduct or contract security operations. This standard enables the constant development of security services, while ensuring customer safety and respect for human rights. Moreover, ISO 18788 demonstrates compliance with laws and regulations, and the establishment of professional security operations to better meet the customer and stakeholder needs.
**BENEFITS OF ISO 18788 CERTIFICATION**

- Increases credibility through certification
- Enhances reputation and performance
- Increases the probability of operational success
- Provides operational safety assurance for customers, governments and communities
- Demonstrates accountability to law and respect for human rights

**IS YOUR ORGANIZATION PREPARED FOR ISO 18788 CERTIFICATION?**

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations successfully lead and manage the implementation of a SOMS. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 18788 audit and certification process:

- ISO 18788 Introduction (1 day)
- ISO 18788 Foundation (2 days)
- ISO 18788 Lead Implementer (5 days)
- ISO 18788 Lead Auditor (5 days)
Quality Management Essentials (QME) Certification

Quality Management Essentials is an innovative service that is offered by PECB for an easier and quicker implementation of a standard covering its most important sections. Applying Quality Management Essentials (QME) improves your organization’s value proposition, cost efficiency, and customer relationship. Certifying your organization against QME demonstrates that you are compliant with the requirements of ISO 9001 and follow quality management best practices while efficiently addressing potential challenges.

BENEFITS OF QME CERTIFICATION

› Shows commitment to customer satisfaction
› Ensures confidentiality
› Improves performance of affected processes
› Identifies and encourages more efficient and time-saving processes
› Manages crises more effectively
› Ensures management support for the implementation of the EMS
› Determines and maintains required infrastructures
TRANSPORTATION, TELECOM AND ENERGY

Transportation, Telecom and Energy standards outline a specific set of processes and frameworks which attempt to ensure that organizations are maintaining qualitative processes and procedures such as the planning of processes, identifying customer needs, and setting organizational goals and objectives.

Certifying your management system against Transportation, Telecom and Energy standards will help your organization to offer higher quality products and/or services, identify market needs, and ensure that all organizational operations are well-aligned with the respective goals and strategies.

Our Transportation, Telecom and Energy Management Certifications include the following standards:

- ISO 50001 – Energy Management Systems;
ISO 39001 helps organizations to prevent road traffic incidents and improve performance and compliance with regulatory requirements. Implementing the ISO 39001 framework will demonstrate that your organization has the ability to identify and reduce the threats and risks related to road traffic safety. Moreover, your organization will be able to reduce customer complaints, increase profit margins and gain a competitive advantage as a result.
BENEFITS OF ISO 39001 CERTIFICATION

- Improves the organization’s image and credibility
- Reduces traffic incidents and reduce costs
- Promotes new business by improving the organization’s profile
- Improves productivity
- Increases competitive advantage
- Meets regulatory requirements and laws

IS YOUR ORGANIZATION PREPARED FOR ISO 39001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons, whom intend to help organizations manage, implement, and improve their framework to reduce traffic incidents and promote compliance to regulatory requirements. The following training courses will equip individual with the right knowledge and skills to help your organization prepare for the ISO 39001 audit and certification:

- ISO 39001 Introduction (1 day)
- ISO 39001 Foundation (2 days)
- ISO 39001 Lead Implementer (5 days)
- ISO 39001 Lead Auditor (5 days)

According to the World Health Organization:

- 1.25 million road traffic deaths occur every year;
- 49% of all road traffic deaths are among pedestrians, cyclists, and motorcycles;
ISO/TS 29001 specifies Quality Management System requirements for the petroleum, petrochemical and natural gas industries. Its main aim is to enhance customer trust and confidence in daily operations through the effective application of the system, as well as the implementation of continual improvement processes, conformity assurance, and regulatory requirements. Being certified with ISO/TS 29001 demonstrates that your organizational processes and procedures are committed to quality.
BENEFITS OF ISO/TS 29001 CERTIFICATION

- Increases efficiency and revenue
- Improves supplier relationships
- Secures environment for your company
- Reduces product and supply chain waste
- Monitors performance and continual improvement
- International recognition

IS YOUR ORGANIZATION PREPARED FOR ISO/TS 29001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons whom intend to help organizations establish a framework that aims to improve the quality in oil and gas industries. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO/TS 29001 audit and certification process:

- ISO/TS 29001 Introduction (1 day)
- ISO/TS 29001 Foundation (2 days)
- ISO/TS 29001 Lead Implementer (5 days)
- ISO/TS 29001 Lead Auditor (5 days)
The ISO 50001 Energy Management standard specifies the requirements that organizations in all sectors can follow to improve their energy efficiency, energy use, and consumption. Implementing the requirements of ISO 50001 within your organization proves its commitment to reducing the environmental footprints and further improving energy management as a whole.
BENEFITS OF ISO 50001 CERTIFICATION

- Reduces energy costs
- Enhances credibility for stakeholders and customers
- Improves performance and productivity
- Ensures continual improvement
- Complies with energy efficiency and emission reduction obligations
- Demonstrates your corporate social responsibility
- Assures
- Reduces carbon footprint and greenhouse-gas emissions

IS YOUR ORGANIZATION PREPARED FOR ISO 50001 CERTIFICATION?

In addition to providing auditing and certification services for management systems, PECB is also accredited to provide certification services for persons, whom intend to help organization improve their energy performance. The following training courses will equip individuals with the right knowledge and skills to help your organization prepare for the ISO 50001 audit and certification process:

- ISO 50001 Introduction (1 day)
- ISO 50001 Foundation (2 days)
- ISO 50001 Lead Implementer (5 days)
- ISO 50001 Lead Auditor (5 days)
We provide our training and certification services through our network of resellers. PECB has a network of more than 1,200 resellers who are located worldwide. As such, we take pride in our services and relationships and we always stick to delivering highly qualitative services that exceed expectations.
